CANELYS[®]

**THE MOST CONCENTRATED CINNAMON FOR POWDERY MILDEW AND MITE CONTROL.
NATURAL CARE FOR YOUR CROP WITH ZERO RESIDUE.**

CANELYS[®] is a powerful organic fungicide and miticide based on concentrated cinnamon extract. Recommended for the control of powdery mildew and mites (red spider mite, crystalline mite and others) on different crops. It allows treatments to be carried out at any time of the season as it is "Zero Residue".

CANELYS[®] acts by contact, with a strong eradicant mode of action on the protective structures of the pest or disease. It degrades the mycelium of fungi or the cuticle of mites, achieving immediate control of the pest (after 12-24 hours depending on the dose). Curative and preventive effect in organic and conventional farming.

**Organic oidicide/miticide
based on cinnamon
extract.**

**Action by contact with
eradicating effects on pest
infestations.**

**Repellent of pathogenic
sucking insects**

You can consult **CANELYS®** and the rest of the Botanicals line [here](#).

Composition

- Cinnamon extract concentrate 70 % w/w (*Cinnamomum zeylanicum*)

Uses

- Product intended for foliar use, contact action.
Repeated applications spaced according to the reproductive cycle of the target pest or disease are recommended to reduce pest or disease pressure.

General dosage*

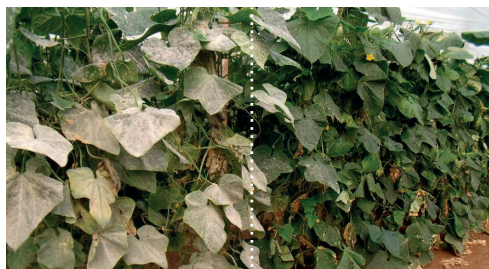

- **Powdery mildew and other diseases:** 2-3.5 cc/L
- **Mites** (red spider mite, brown mite and others): 3.5-4 cc/L

*The recommended uses, doses and biological targets will depend on the countries and registrations authorised for that product, so it is recommended in all cases to check the regulatory situation in each country prior to application.

CONTROL

CANELYS®

CONTROL

CANELYS®

CONTROL (t = 0 h)

CANELYS® (t = + 24 h)

CANELYS® greatly reduces the spread of the powdery mildew fungus (left panels). In addition, it is able to control both adults and spider mite eggs by contact in less than 24 hours (right-hand panel).
