KABON[®]

**MAXIMUM PURITY BIOINSECTICIDE. AFRICAN PALM EXTRACT.
SAPONIFIED SPECIFICALLY FOR CROPS.**

KABON[®] is an effective general bioinsecticide based on saponified African palm extract. Recommended for the control of minor insects, both eggs and adults of mites, aphids, thrips, whiteflies and others that affect different crops.

KABON[®] has a healing effect, with a contact mode of action, drying cuticles and plugging breathing channels. In addition, it has a powerful wetting and cleaning effect that improves the uptake of other foliar treatments. It can be applied at any time of the season as it is "Zero Residue", both in organic and conventional farming.

**Organic bioinsecticide
based on saponified
palm oil.**

**Contact action on
various soft-bodied
pests.**

**Leaf surface improver and
honeydew remover.**

You can consult **KABON®** as well as the rest of the Botanicals line here.

KABON®

Composition

- African palm extract saponified (*Elais guineensis*) 50 % w/w

Uses

- Foliar contact action. Repeated applications spaced according to the reproductive cycle of the pest are recommended.
